

Common flowscripts

```
@Library( 'mash@2.0' )  
import runCommonPipeline  
  
runCommonPipeline 'foo'
```

moderne Familien

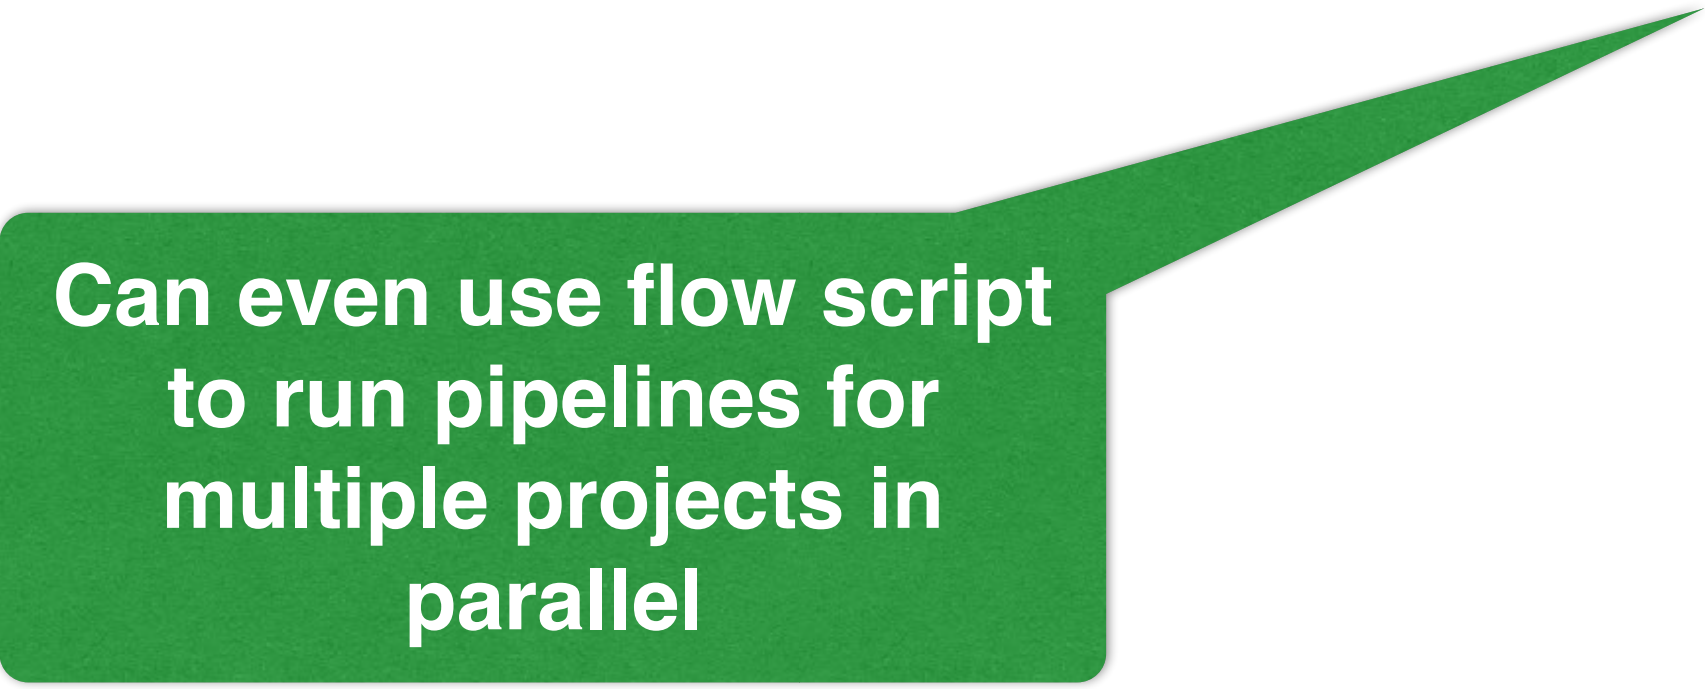

```
@Library( 'mash@2.0' )
import runCommonPipeline

parallel 'first': {
    runCommonPipeline 'first', 'First'
},
'second': {
    runCommonPipeline 'second', 'Second'
}
```

multiple/multiple

Scripted pipeline *Jenkinsfile* uses common flow script. Changes for multiple pipelines can be made in single, central location

A green callout box with a white border and a pointed right side, containing white text.

**Can even use flow script
to run pipelines for
multiple projects in
parallel**

A green callout box with a pointed right side, containing white text.

**Notice syntax for using a specific
version of a shared library**

Common flow scripts

moduleFoo/Jenkinsfile

```
@Library('mash@2.0')
import runCommonPipeline

runCommonPipeline 'foo'
```

Notice syntax for using a specific version of a shared library

Can even use flow script to run pipelines for multiple projects in parallel

Scripted pipeline *Jenkinsfile* uses common flow script. Changes for multiple pipelines can be made in single, central location

moduleMultiple/Jenkinsfile

```
@Library('mash@2.0')
import runCommonPipeline

parallel 'first': {
    runCommonPipeline 'first', 'First'
},
'second': {
    runCommonPipeline 'second', 'Second'
}
```
